

Rohit Gupta
Backend Developer

Shahdara , Delhi | rohitguptaradheradhe123@gmail.com | 7678686855 | [LinkedIn](#) | [Github](#) | [Leetcode](#)

SUMMARY

Java Developer with strong backend expertise, having solved 450+ LeetCode problems across DSA, dynamic programming, graph algorithms. Built a robust AI-powered WhatsApp automation agent using Java, Playwright, and REST API, handling 10+ user commands including Google search, Gmail scraping, and multi-model AI chat integration. Passionate about scalable systems, automation, and clean architecture.

EDUCATION:-

Bachelor of Technology (B. Tech) in CSE | Galgotias University, Gr. Noida | CGPA: 7.6 **Expected June 2026**

Class XII – CBSE Board | Navin Bharti Senior Secondary School, Delhi | *Percentage: 77.8%* **2022**

Class X – CBSE Board | Navin Bharti Senior Secondary School, Delhi | *Percentage: 85%* **2020**

Programming Languages: Java

Web Technologies: HTML, CSS

Databases: PostgreSQL (learning)

Tools & Frameworks: Java AWT, Threading, Git, GitHub, Playwright Automation (Java), Data Scraping, REST APIs

Soft Skills: Teamwork, Communication, Problem-Solving, Leadership, Listener

PROJECTS

WhatsApp Agent (Advance) – Java, Playwright, REST API | [GitHub](#)

May 2025

- Engineered a scalable WhatsApp automation bot in **Java** leveraging **Playwright**, handling 1,000+ daily interactions with secure and reliable command control.
- Integrated sophisticated **web scraping** and **REST API** automation for dynamic data extraction from platforms like Google and YouTube, enhancing response accuracy and breadth.
- Developed and deployed 10+ AI-powered conversational commands, optimizing response times by 50%—from 10 seconds down to under 5 seconds—to significantly boost user engagement.
- Designed and implemented advanced **spam detection** and prevention systems, ensuring secure, uninterrupted bot operation and maintaining interaction quality.
- Conducted in-depth **website exploit detection** and vulnerability assessments within the automation pipeline to strengthen overall system security and robustness.

Java Library: IntraINFO – Java, Playwright, REST API | [GitHub](#)

In Progress

- Designed and developed a Java-based library to integrate and unify data from multiple anime content providers.
- Implemented support for 3 content providers, enabling real-time anime search, deep metadata retrieval, and content downloading capabilities.
- Built extensible architecture to support easy addition of future providers and advanced search functionality.

INTERNSHIPS

Project Intern – CodeSoft

Dec 2024

Engineered a robust framework using Java and Git for cross-functional collaboration, which accelerated module deployment by 30% and ensured alignment with client requirements through iterative feedback and agile methodologies.

Embedded System Developer – EduSkills

Jan-March 2024

Gained hands-on experience with hardware programming and micro-controller interfacing. Completed 3 project simulations demonstrating IOT integration and sensor data processing.

CERTIFICATIONS

Postman API Fundamental Certificate 2025

Dec 2024

ACHIEVEMENTS

- Solved 450+ Leet Code problems covering all advanced DSA topics including:
- Dynamic Programming, Greedy, Graphs, Backtracking, Trie, Graphs, and Sliding Window techniques.
- Built deep understanding of time-space complexity trade-offs, improving average problem-solving time by over 40% across competitive platforms.
